

SUVOJIT HORE

Senior AI Engineer

Email: suvojit.hore.1@gmail.com | Phone: +91 98041 25414

LinkedIn: [linkedin.com/in/suvojith](https://www.linkedin.com/in/suvojith) | Portfolio: suvojith.github.io

Location: Bangalore, India | Notice Period: 45 days

PROFESSIONAL SUMMARY

Suvojit is a **Senior AI Engineer with 6.6 years of experience in Data Science** developing and productionizing AI agents in Python.

Domains: Generative AI with **Large Language Models** in **Python**; Agentic AI and automation in Python with **Langchain**, **LangGraph**, FastAPI, SQL, Streamlit, React; Data Science Pipelines with **Python**, **Pyspark** in **Azure**, **AWS** and **Databricks**; Natural Language Processing (NLP), Computer Vision, Machine Learning, Deep Learning.

Suvojit has a **Master's Degree in Artificial Intelligence** and Machine Learning from BITS Pilani, a Tier 1 Institute in India. He holds AWS ML Speciality, AI Practitioner, Azure AI Engineer, Azure Data Scientist, Nvidia and Databricks certifications.

He is currently building and productionizing **AI Agents in Python for millions of users in Australia** for end to end automated insurance claim processing that autonomously analyze incidents, make decisions, and manage memory across interactions. He has solved business problems for **clients across insurance, banking and finance, retail, e-commerce, oil and gas, real estate, healthcare, legal, IT, and hardware**.

EDUCATION

Master of Technology - Artificial Intelligence and Machine Learning | **Birla Institute of Technology and Science** | Pilani, India (Online) | Nov 2024 | Specialization: Natural Language Processing | CGPA: 8.8

Bachelor of Technology - Mechanical Engineering | **SRM Institute of Science and Technology** | Chennai, India | May 2019
Aggregate: 84%

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, C++

Frameworks: LangChain, LangGraph, LlamaIndex, Autogen, Crew AI, Pydantic, PyTorch, TensorFlow, Transformers

Tools & Platforms: Azure Databricks, AWS, GCP, PySpark, MLflow, Neo4j, n8n, Microsoft Fabric, Docker, Kubernetes, Streamlit, Gradio, FastAPI, Jupyter, Git, VS Code, Cursor, Claude Code

AI/ML Concepts: Gen AI, LLMs, RAG, Agentic AI, Autonomous Agents, NLP, Computer Vision, Deep Learning, MLOps, AIOps, CI/CD

WORK EXPERIENCE

Senior AI Engineer | **EXL** | Bangalore, India | Aug 2024 – Present

- Productionized a **multi-agent** orchestrated claims-processing system for millions of users in Australia using **Python**, **SQL**, **LangGraph** and **PySpark on Azure Databricks** with **RAG**, **Neo4j database**, and **MLflow** lifecycle tracking, autonomously analyzing incidents, maintaining memory, and driving claims decisions with **Claude Opus**. Reduced time to claim finalization by 98% (2 months to 1 day) and cost of operation by 56%.
- Implemented **AIOps** and large-scale inference optimization for production **LLM workloads** on **Databricks Model Serving** - autoscaling endpoints, request batching, latency and cost tuning, with automated monitoring, anomaly detection and alerts.
- Productionized and deployed a **GenAI chatbot** for **150,000+** Australian users with **Neo4j graph databases** and optimized chunking enabling stakeholders to query insurance documents, retrieve policy details, and file claims through **n8n-automated workflows** - **OpenAI GPT-5**, **Mistral**.
- Engineered and productionized Agent Toolkit, an **AI agent**-building framework built with **LangGraph** and **LlamaIndex**, adopted across all agentic AI initiatives, accelerating prototype to production time by 57%.
- Developed and productionized a **PII deidentification tool leveraging LLMs** with iterative feedback loops and **MLflow tracing** to mask sensitive data, replacing manual masking cycles and accelerating prototype production by 70%.
- Built an **AI Twin** application replicating an individual's appearance, voice, and speech using **Agentic AI**, **RAG**, and **lip-sync**; used by **EXL CEO Rohit Kapoor** in his showcase.

Senior Data Scientist | **EY (Ernst & Young)** | Noida, India | *May 2024 – Aug 2024*

- Developed a multimodal LLM-based compliance solution verifying image, video, audio, and text in advertisements against guidelines for computer hardware clients.
- Developed a chatbot with a fine-tuned open-source LLM to answer queries about India's new legal framework - Bhartiya Nyaya Sanhita.

Senior Applied Data Scientist | **Dunnhumby** | Gurgaon, India | *Dec 2021 – May 2024*

- Developed and deployed a **recommendation engine** and revenue management system **in production** for the **UK's largest retailer using Python, PySpark, and SQL on Azure Databricks with MLflow** experiment tracking, driving a 315% sales increase through dynamic pricing, price optimization, and demand forecasting.
- Developed and **productionized a chatbot** for business users by **fine-tuning open-source LLMs** with distributed training across multi-GPU **Azure Databricks clusters**, converting **natural language to SQL and Python code**; won Hackrush hackathon for the initial prototype.
- Developed and deployed in production customer family segmentation models using **Python, PySpark, SQL, and XGBoost** to drive personalized revenue management and dynamic pricing strategies across retail and ecommerce.
- Led media campaign evaluation and revenue attribution using **Python, PySpark, random forest, and K-means clustering** for retail and ecommerce clients across UK and Norway.
- Trained demand forecasting and healthy food recommendation models for a Norwegian retail client using **Python, PySpark, PyTorch, XGBoost, and FastText**, improving product placement and category revenue growth.
- Developed and productionized a **dashboard** and coding assistant bot using **LLMs, RAG and vector databases** to assist data scientists with coding, debugging, and internal solution queries.

Data Scientist | **Infosys R&D** | Bangalore, India | *Dec 2019 – Dec 2021*

- **Finetuned Pix2Pix C-GAN using TensorFlow** to generate synthetic images of meat whose texture is driven by the input condition, used as a synthetic dataset extending existing data with more variation. This was deployed in production for a large food processing company in the US.
- Developed a **chatbot with RASA** and deployed in production for a British telecommunications company for internal stakeholders (policies and other information).
- Built an automated **cluster analysis and topic modelling dashboard** in Python and deployed in production for an American bank to classify and understand users for better marketing promotions and customer support.
- Developed real-time meat classification on a conveyor by **training a CNN model** for an American food processing company.
- Developed an automated form and **receipt OCR using OpenCV and Tesseract** in production used by multiple projects.

RESEARCH PUBLICATIONS & PERSONAL PROJECTS

Beyond the Mirror: AI Twins Using Large Language Models | **MLDS 2025**

- Presented my app at Machine Learning Developers Summit (MLDS) 2025. Won Early Trailblazer Award at EXL for the same project. Link: https://www.youtube.com/watch?v=U0GiN_VxGVo

Breaking the Language Barrier: Natural Language to SQL Using LLMs | **MLDS 2024**

- Presented my work at MLDS 2024. Won Hackrush hackathon at Dunnhumby for the same project. Link: <https://www.linkedin.com/posts/very-proud-and-excited-that-one-of-our-senior-share-7158751133237182464-GMg2/>

CERTIFICATIONS & ACHIEVEMENTS

Microsoft Azure Data Scientist & AI Engineer | **Microsoft**

AWS Machine Learning Specialty & AI Practitioner | **Amazon Web Services**

NVIDIA Generative AI LLMs | **NVIDIA**

Databricks LLM for Production | **Databricks**

Docker for Data Scientists | **LinkedIn**

Early Trailblazer Award & Emerging Analyst Award | **EXL** | *2024 – 2025*

- Early Trailblazer Award for delivering the AI Twin project for EXL CEO within 3 months of joining (2024); Emerging Analyst Award for spearheading client innovation with Agentic AI within 5 months of joining (2025).

Hack Rush Winner, GMS Star Award & Award for Excellence | **Dunnhumby, Infosys & Indian Statistical Institute** | *2014, 2021 – 2023*

- Winner of Hackrush hackathon (Dunnhumby, 2023); GMS Star Award for healthy product classification (Dunnhumby, 2022); Award for Excellence for automated cluster analysis dashboard (Infosys, 2021); Medal of Distinction - Mathematics Talent Reward Program, Indian Statistical Institute (2014).
